Summary

I'm a seasoned full-stack developer on a mission to create captivating digital experiences. With a dynamic front-end arsenal featuring React (Next.js), React Native, Svelte, and Framer Motion, I craft captivating animations and sleek interfaces. On the back-end, I wield SvelteKit, Node.js (Express), and Laravel to build robust and efficient services that bring ideas to life. It's not just about code; it's about molding immersive web and mobile applications that linger in memory. I'm an unrelenting explorer of emerging trends and technologies, perpetually pushing the boundaries of web and mobile development. Ready to mesmerize? Let's connect and turn your visions into remarkable digital realities!
